

Brand new website

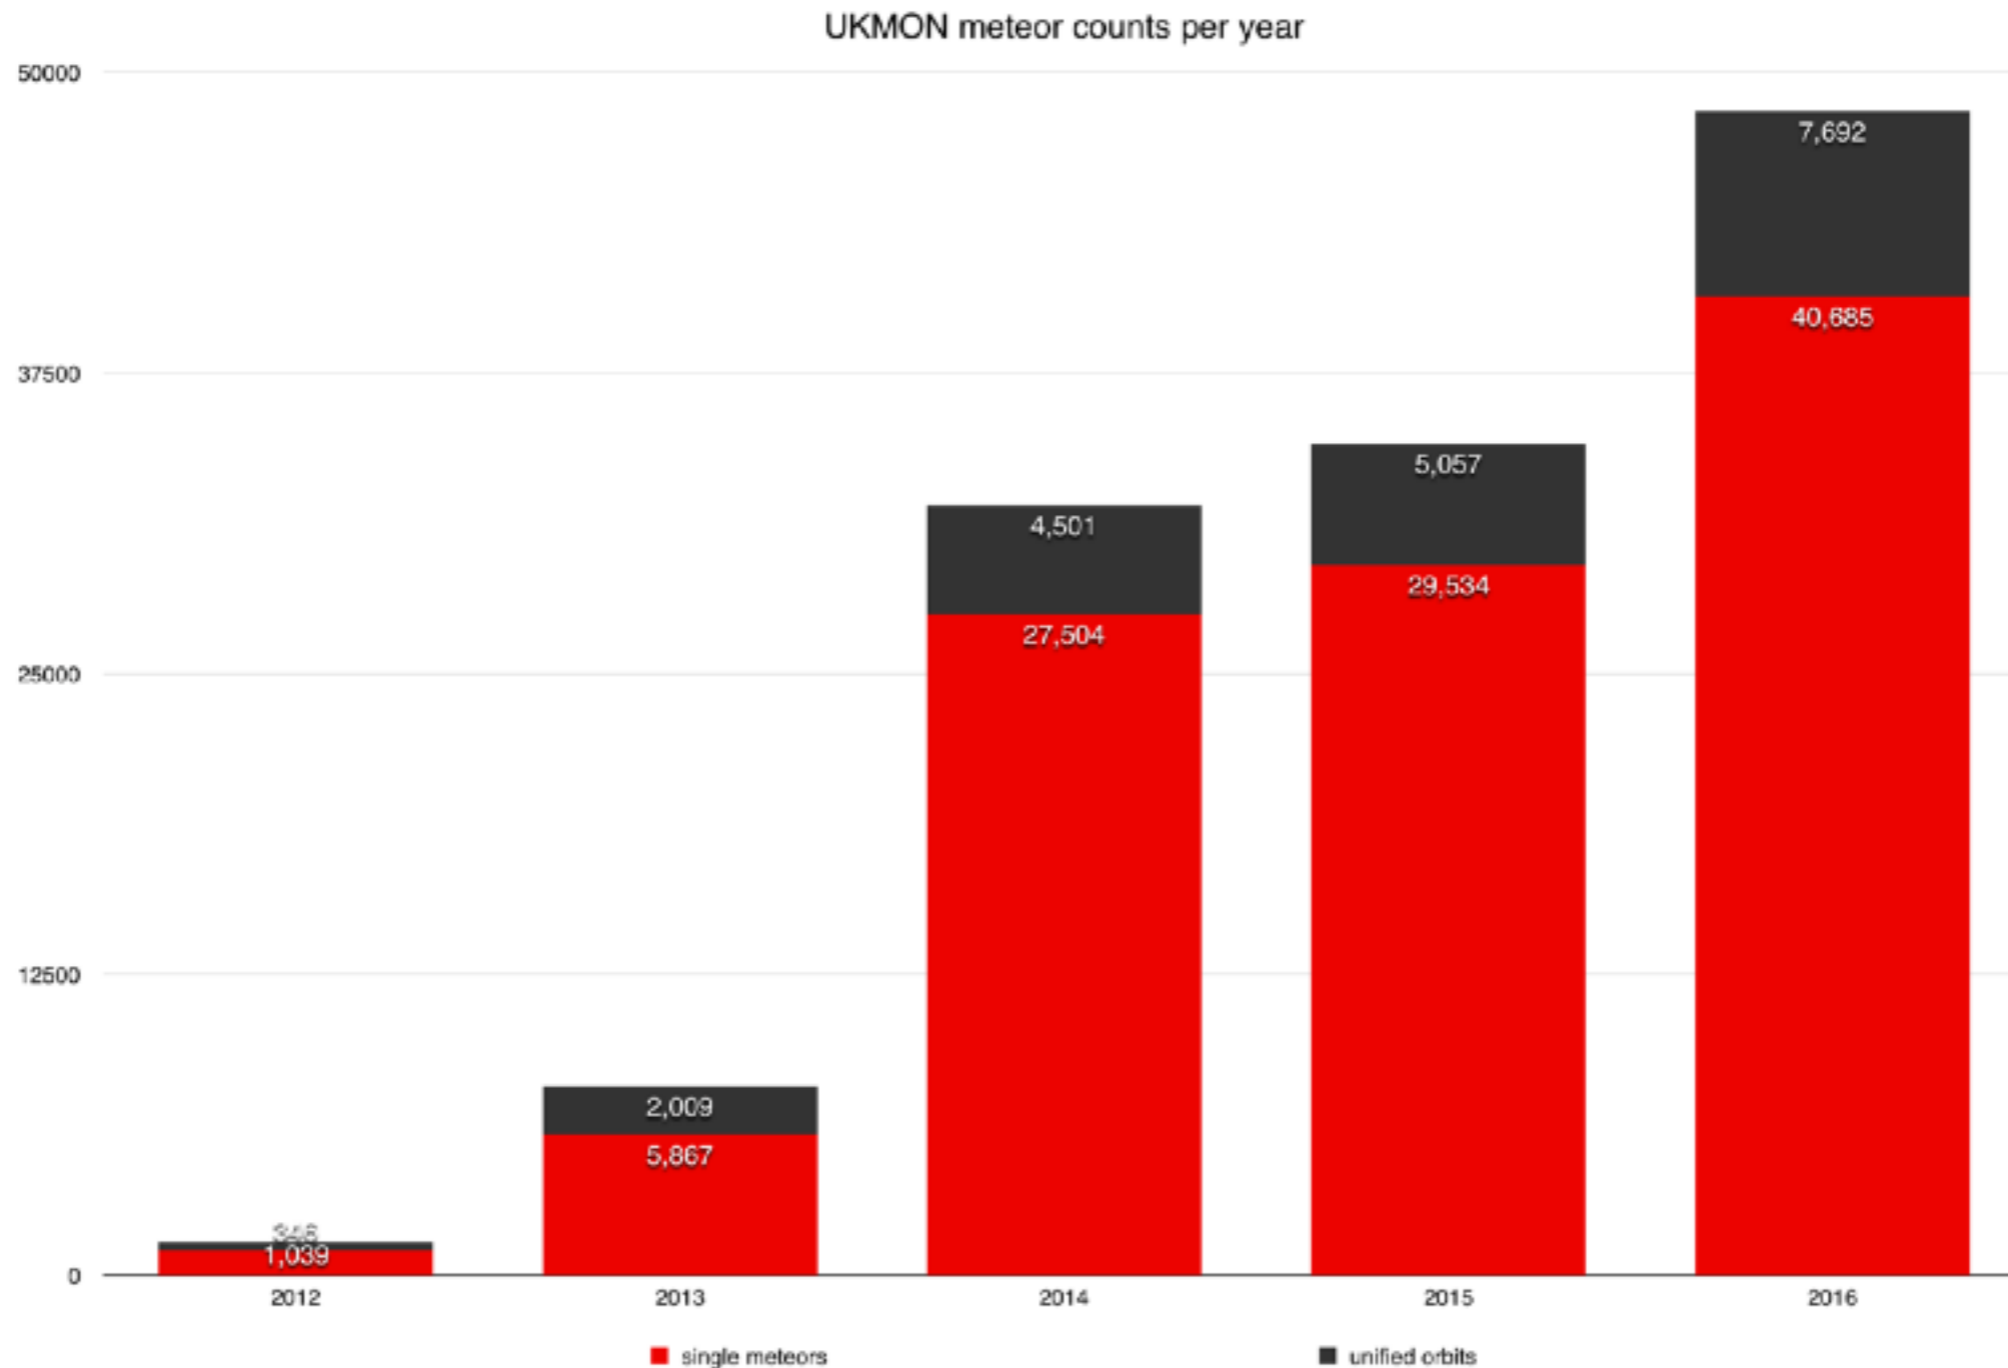

New, stable and server-less platform to offer more services to UKMON members

- Solid performance
- Fast globally
- 0 maintenance time
- Growing platform
- News, fireballs, reports, hardware
- meteor archive is coming soon
- and much more!

The screenshot shows the UKMON website homepage. At the top is a navigation menu with links for UKMON, NEWS, FIREBALLS, REPORTS, ABOUT, NETWORK, EQUIPMENT, and DOWNLOADS. The main header features the UKMON logo and the text 'United Kingdom Meteor Observation Network' and 'Network of detection cameras watching and recording meteors over United Kingdom'. A prominent 'Report Fireball' button is visible, with the text 'Have you seen a fireball? We would like to hear from you' and a 'submit report' button. Below the header, there are sections for 'What is UKMON', 'Why we do it?', 'Capturing meteors', 'Teamwork', and 'Join us'. The 'Latest fireballs' section displays four featured fireball events with images and captions: 'Bright Meteor over the South of England', 'Fireball reported by public', 'Exeter fireball at dusk', and 'First Lyrid Fireball for UKMON'. The footer includes a Creative Commons license notice, copyright information for 2017, and social media icons for Twitter, Facebook, Instagram, YouTube, and GitHub.

Archive of data

UKMON meteor archive contains all recorded data collected in 5 years over the UK.

Data as of June 2017
